

Deliver a transportation benefit that your members can depend on.

Partner with Roundtrip to increase access to care with the most reliable NEMT network and design a transportation benefit specific to your members’ needs, anywhere in the United States. Our platform allows health plans to create benefits at the per-member or group level through trip or budget limits and gain powerful benefit management tools to manage costs, utilization by member, member satisfaction ratings and more.

Roundtrip is a comprehensive coordination solution and market aggregator, not just another transportation company. Members are the priority, and Roundtrip works to ensure that transportation is not only eliminated as a barrier to care, but an easy and pleasant experience for every member.

How it works:

Use Roundtrip to:

- **Offer the full spectrum of vehicles.** Book any type of vehicle for any member: rideshare, medical sedans, wheelchair vans, and non-emergency ambulances all in one place.
- **Optimize your member experience.** Roundtrip has received 4.7 out of 5 stars from all of our Medicare riders due to our unique set of technology and service offerings.
- **Positively impact health outcomes.** Roundtrip partners with you to keep transportation costs to a minimum while impacting health outcomes and cost of care, i.e. reduction in readmissions.
- **Get better insights.** Use data to determine the success of the transportation benefit. Our HIPAA-compliant platform provides member information across 43 data points.
- **Customize your benefit design.** Offer a variety of different benefit limits with Roundtrip, i.e. ride limit, budget limit, mileage limit, and more.
- **Leverage a nationwide network.** Serve your member population with access to reliable and consistent transportation resources.
